Class Projects

Introduction to Class Projects

Lecture

Code Along Projects

- We have completed our introduction to Microsoft Intune and Apple Device Management.
- Real-world projects to challenge you and begin to establish your organization's pilot program for Apple Platform Management.
- Opportunities to pause the video and configure your environment.

Preparation

- Remove any test groups and test devices created as part of the introduction lessons.
- Ensure configuration of Apple Business Manager, Federation, Volume Purchase Program, etc.
- Remove test objects like configuration profiles, apps, etc created in the introduction portion of this course.
