Software Inventory

Introduction to Automata Deploy

Lecture

Mac Software Management

- ✖ Scripting Update Checks & Maintaining LOB Apps
- ✖ Time Consuming
- ✖ Can be Complex
- ✖ IT Dept Skip Updates
- ✖ Technical Expertise

Automata Deploy Pro greatly simplifies Mac software management

Automata Deploy Pro

- Similar to *Microsoft Intune Enterprise Catalog* (**but for Mac**)
- **200+ Applications** not available in the Mac App Store
- Can package **additional applications on demand**
- Automatic Updates (with **per app version control**)
- Works with Intune but **doesn't require an MDM**
- \$6.99 (Deploy) and \$9.99 (Deploy Pro) per device **per year**.

Packaging Additional Apps

- ❖ Need an application that isn't included in the standard Automata Deploy Catalog?
- ❖ Deploy Pro tier includes an option for a private catalog with additional applications.
- ❖ Automata Technology Services can package additional commercial applications like AutoCad, ProTools, Maya, Avid Composer, and more.
- ❖ Additional fees can apply.

Software Inventory Reporting

- Built-in reporting of software inventory per machine, group, and application.
- Exportable reports on every application installed on your managed Macs.
- Identify opportunities for software license reduction and ensure license compliance.

Cloud Infrastructure

- ❖ Multi-tenant
- ❖ Built on Munki
- ❖ Cloud based infrastructure
- ❖ Ideal for Hybrid & Remote Workforce
- ❖ On Premises option also available (where required)

How it Works

Step 1: Install the Automata Deploy Software Portal

How it Works

A screenshot of the Automata Software Catalog web interface. The title bar reads "Automata Software Catalog" and shows a user profile for "Drew Smith". Below the title is a search bar with "Show All" and a dropdown for "25 entries per page". A table lists software packages with columns for "Install", "Optional", "Uninstall", "Icon", "Software", and "Latest Version". The table rows include:

Install	Optional	Uninstall	Icon	Software	Latest Version
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		Adium	1.5.10.4
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		Audacity	3.7.0.0
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		Blender	4.2.3
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		Chrome	131.0.6778.70
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		Company Portal	5.2409.1
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>		Cyberduck	9.0.2

A large black cursor arrow points to the "Install" checkbox of the "Company Portal" row.

Step 2: Select Applications to Deploy via Web Console

How it Works

Step 3: Applications Automatically Install and/or Update

Installing the Automata Software Portal
