Third Party Mac Software Catalogs

Introduction to Automata

Deploy

Lecture

Mac Software Management

- Scripting Update Checks & Maintaining LOB Apps

- Time Consuming
- Can be Complex
- IT Dept Skip Updates
- Technical Expertise

Automata Deploy Pro greatly simplifies Mac software management

Automata Deploy Pro

- Similar to Microsoft Intune Enterprise Catalog (**but for Mac**)
 - 200+ Applications not available in the Mac App Store
 - Can package additional applications on demand
 - Automatic Updates (with per app version control)
 - Works with Intune but doesn't require an MDM
 - Free trial now available.

Packaging Additional Apps

- Need an application that isn't included in the standard Automata Deploy Catalog?
 - Deploy Pro tier includes an option for a private catalog with additional applications.
 - Automata Technology Services can package additional commercial applications like AutoCad, ProTools, Maya, Avid Composer, and more.
 - Additional fees can apply.

Software Inventory Reporting

- Built-in reporting of software inventory per machine, group, and application.
- Exportable reports on every application installed on your managed Macs.
- Identify opportunities for software license reduction and ensure license compliance.

Cloud Infrastructure

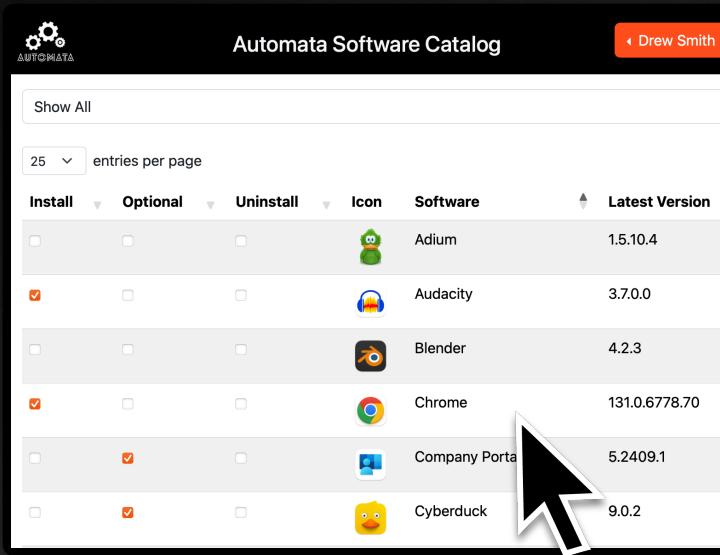

- Multi-tenant
- Built on Munki
- Cloud based infrastructure
- Ideal for Hybrid & Remote Workforce
- On Premises option also available (where required)

How It Works

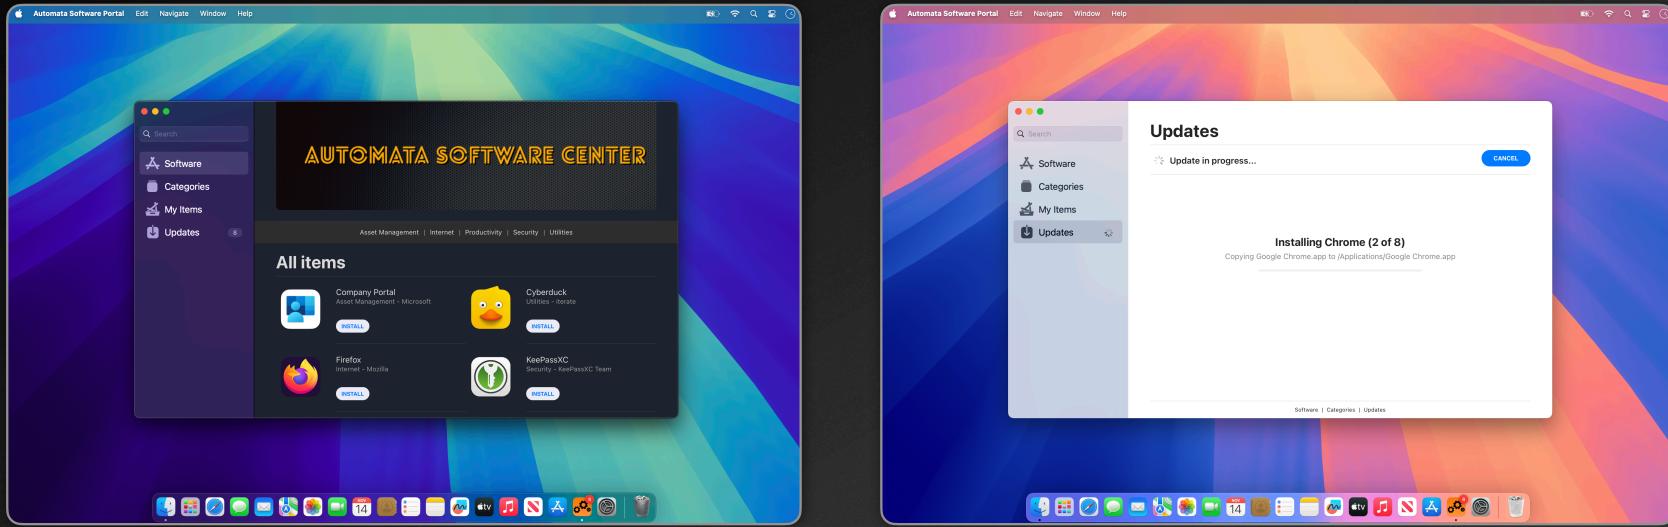

Step 1: Install the Automata Deploy Software Portal

How It Works

Step 2: Select Applications to Deploy via Web Console

How It Works

Step 3: Applications Automatically Install and/or Update

Installing Software Center
